

## BIOAGRAPHY

### *Marc Sadaka Photography*

I have been photographing and videotaping weddings for the past 15 years. I had the opportunity to work with over 400 couples. In southern New England, the cape cod and Newport, RI. I started my career photographing nearly everything. Such as Christening, graduation, bar/bat mitzvah, sweet sixteen, etc... What I discovered along the way is that I'm great at telling stories through pictures. I have the calm patience to observe and capture every moment without disrupting the flow of the wedding day. I tell each couple no matter how important your photos are to you, they are even more important to me. I am not only an artist who offers years of creative know how, but one with the technical expertise and vision necessary to capture your wedding day. Creating images that are cherished for a lifetime,

I consider myself a blend of styles. First of all, I have a strong bias towards photojournalism. I believe the wedding photographer should capture the day as it naturally occurs and not stage or pose every moment. On the other hand, I do love creative portraits! It is my goal to come away from your wedding with a creative portrait that defines the essence of your wedding day and who you are as a couple. Although this creative portrait is a planned situation, I make it feel like it's relaxed and has happened spontaneously. I also love wedding details and found objects and feel they too are just as important to capture in order to complete your wedding story.

My couples are people who know their first priority is to enjoy their wedding day and who want to share all the beautiful moment with family and friends. They are more concerned with the emotional impact of the images and the creativity that I can explore, rather than just having a list of pictures for me to accomplish. My couples understand that this is a once in a lifetime event and want the very best photography.

A wedding is a celebration of two people starting a new branch in the family, and I feel honored to use my skills as a photographer to document what I consider to be one of life's greatest moments. Every single wedding I photograph is distinctive and unique. As a patient observer, I'm always there to calmly capture each moment of your big day so that you'll have memories to look back on for years to come. I'll cover your wedding from start to finish, and I'll work tirelessly to document all your moments. I'm so fortunate and grateful to have helped so many couples achieve the goal of preserving their memories.
